

DX FANZINE Nr. 26 – October 2015

DX Fanzine brings together tips and news as contributed by individual DXers or ascertained from different sources. It is updated daily, otherwise as soon as we receive logs and news from any DXer around the world. We are interested in any change about frequencies, times, language-services, transmitters, programme contents, phone and fax-numbers, electronic and postal address, station personnel. Emphasis is on broadcasting from Africa, the Middle East and the Mediterranean area.

NB: All times, days and dates are day/month GMT-UTC, unless otherwise stated.

Tips are entered in date order. Reception quality shorties: P = Poor, F = Fair, G = Good, E = Excellent.

Material from DX Fanzine may be redistributed, posted to any other location, published or used for broadcast, provided it be fully credited to DX Fanzine and the original and intermediate sources.

Please send your contributions to: tarantodx@hotmail.com

QUANDO IL GIOCO SI FA DURO... RADIO BALTIC WAVE CAMBIA LA SUA POLITICA QSL IN POCHI MINUTI

RADIO BALTIC WAVE QSL POLICY CHANGES IN A FEW MINUTES (SUMMARY IN ENGLISH) In response to a reception report Rimantas Pleikys of Radio Baltic Wave which relay RFE/RL on 1386 kHz sent me a thank you message which didn't include any basic detail about my reception. I wrote a second E-mail and asked

whether or not I should expect to receive a full data verification letter. He replied that as from February 2015 they stopped sending verification letters by snail mail. I sent a third E-mail to Mr. Pleikys in which, after taking note of their new QSL policy, I commented that if such decision was due to the fact that verifying reports requires time and money, a good compromise could be a verification letter sent as a pdf file by E-mail. The story had an happy ending with Mr. Pleiks who finally sent me a full data QSL letter as a pdf file accompanied by some pictures of their medium wave transmitter and antennas.

Il mondo della radio è fatto di persone strane. (Ma con il tempo ho imparato che questa “regola” si applica anche ad altri campi). I miei rapporti d’ascolto contengono sempre una nota, scritta a chiare lettere, che se l’emittente non ha una QSL vera e propria va bene anche una lettera con i soliti dettagli: data, ora UTC e frequenza. A volte, nelle ultime settimane, sono riuscito ad ottenere risposte attraverso la posta elettronica anche da emittenti esotiche sudamericane ed africane (non svelo ancora i dettagli perché è tutt’ora in corso uno scambio di vedute) che mi dicono, ad esempio, che in cambio mi invieranno degli adesivi. La mia replica, educata (in realtà sono infastidito) è sempre la stessa: che vi costa, visto che mi state rispondendo, aggiungere una letterina con due righe. Per evitare che sbaglino, scrivo pure il testo che chiedo di ricopiare! Tuttavia spesso c’è dall’altra parte chi sembra o fa finta di non capire. Ma avrò modo in futuro di rendere noto il tutto. Adesso però vi racconto una storia a lieto fine, capitata oggi, e che forse, permettetemi l’auto-referenzialità, grazie al mio intervento, ha fatto cambiare politica a Radio Baltic Wave che, ho appreso oggi, da una loro mail di conferma al mio rapporto di ricezione, da febbraio 2015 non invia più la completissima lettera QSL. E che culo! Avevo notato che ad un bulgaro avevano confermato a gennaio 2015.

Non mi sono scoraggiato anche se poi mi sono detto ma perché nella mail oltre a ringraziare non confermano, con tanto di dati, anche il mio rapporto? Ho risposto prendendo atto della loro decisione e che l’avrei resa pubblica, argomentando che a ciò forse sono arrivati per una questione di budget, visto che, probabilmente, ricevono centinaia di rapporti d’ascolto. Ho poi aggiunto però che dal mio punto di vista di appassionato delle onde medie e corte, una buona alternativa sarebbe potuta essere una lettera QSL in formato pdf spedita, ovviamente, via mail. E’ stato facile osservare che con una fava avrebbero preso due piccioni: io sarei stato accontentato e loro avrebbero risparmiato soldi e tempo. Dopo qualche minuto mi è arrivata la lettera QSL come avevo richiesto. Mi auguro che abbiano capito e che dalla semplice mail di ringraziamento tornino a verificare anche se via mail e non più per posta con la consueta lettera QSL. Insomma dopo tre messaggi di posta elettronica e qualche ora dall’invio del rapporto d’ascolto Radio Baltic Waves International, 1386 kHz, ha confermato con le modalità descritte. V/S: Rimantas Pleikys che ha avuto la pazienza di sostenere il confronto con me! Il rapporto è stato inviato al seguente indirizzo: riplei@takas.lt Chissà se riceverò anche risposta da RFE/RL a cui ho pure inviato una copia del rapporto visto che l’emittente ripetuta da Baltic Wave era Radio Svoboda (Liberty).
