

DX Fanzine No. 115 – April 2023

DX Fanzine, an electronic newsletter which was originally edited in 1999/2000, brings together tips and news as contributed by individual medium/short wave listeners or ascertained from different sources. DX Fanzine, which doesn't pretend to be in competition with any other electronic DX newsletter, is a compiled publication (not cut-and-paste) intended for sharing of DX reception notes, loggings, QSL details, and general news about medium and short wave (AM) broadcasting stations. As most printed DX magazines went out of print or changed to "digital-only" versions of their former selves, we set about making a bulletin as simply as possible (and free of charge!) that covered essentially two things: what is being heard on both, medium and short waves, and how to get a QSL verification from a radio station. Not only DX Fanzine is being distributed each month, free, via E-mail, to various Clubs, organizations and individuals worldwide but is also available on the web at www.dxfanzine.com and www.dxfanzine.org. The current as well as the previous editions of DX Fanzine (including those of years 1999/2000!) can be accessed from its home page and are there almost indefinitely.

NB: All times, days and dates are day/month GMT-UTC, unless otherwise stated. Logs are entered in frequency order. Reception quality abbreviations: P = Poor, F = Fair, G = Good, E = Excellent. Language abbreviations: AA=Arabic, CC=Chinese, CT=Catalan, DD=Dutch, EE=English, FF=French, GG=German, HA=Hausa, IT=Italian, JJ=Japanese, KK=Korean, PP=Portuguese, RM=Romanian, RR=Russian, SS=Spanish, VV=Vernacular.

Material from DX Fanzine may be redistributed, posted to any other location, published or used for broadcast, provided it be fully credited to DX Fanzine and the original and intermediate sources. **Next deadline: 30.04.23**

Please send your contributions to: dxf@dxfanzine.com **EDITOR:** Antonello Napolitano (AN).
LAST UPDATED: 02 April 2023, at 16.15 UTC. **Web:** www.dxfanzine.com www.dxfanzine.org
The cover photo (Courtesy of Jahri Lehtinen) shows the building of Emisora CMKC Radio Revolucion, which operates from Cuba and was recently heard in Finland on 840 kHz.

LETTERS TO THE VOICE OF KOREA RETURNED BACK TO ITALY AND AUSTRIA. WHAT'S ABOUT E-MAILS? by Antonello Napolitano

Recently, a post by Austrian DXer, Harald Suess, appeared in the A-DX Mailing list, telling his experience with a letter sent to The Voice of Korea, in Pyongyang, North Korea, which was returned back to him with the following note: "The mail could not be delivered due to the blocjed postal route". A few weeks ago I also received back a letter to The Voice of Korea with a label over the envelope with the same note (inclusive of typo error!) "The mail could not be delivered due to the blocjed postal route". The letter was posted in Italy on 13.05.2022 About the subject of e-mails to VOK, let me say that the service seems to be active. In May 2022,

the electronic version of my reception report in Spanish sent also by post and returned back, was e-mailed to vok@star-co.net.kp, too. I am 100% sure that my report was delivered to the Spanish section of VOK, as some comments I included, were mentioned on air! It should be also mentioned that, after having read a post on the Facebook page of "Club de Oyentes de La Voz de Corea" (now disappeared), warning that only e-mails sent via Russian, Chinese or Japanese providers, are actually delivered to North Korea, as live.com, gmail.com and Hotmail.com are being blocked and, therefore, e-mails via those providers are always bouncing. That explains why, I created a new e-mail address via the Chinese provider 163.com and, actually, my e-mail message was delivered to VOK. The sad side of this story is that – until now – there has been no response (QSL card or any promotional printed matter) from the station. If this is only due to the fact that after the spreading of Covid 19 in North Korea, the single border post between China and North Korea, from which all foreign mail from abroad to DPRK goes through, has been closed remains a question mark.

Signals Discovered Remotely! Web SDR, an exciting opportunity for everyone to catch DX Stations on Medium Waves.

DX Logs by Leonardo Bolli. All stations heard via Web Kiwi SDR receivers located in: S (Sardinia, Italy – Loop – now offline), NE (North East Italy – Beverages), CH (Swiss mountains – now offline).

RTÉ Radio 1 will cease broadcasting on Long Wave 252 from Friday 14th April 2023.

The station continues to broadcast on FM, on Saorview and Saorsat, along with RTÉ Radio Player and Irish Radioplayer apps.

In the UK, Radio 1 will still be available on Freesat, Sky, and Virgin Media, along with online streaming services such as smart speakers.

The phasing out and closure of the Long Wave service was one of the recommendations of the Future of Media Commission Report which was published by the Government in July 2022. This was part of a wider recommendation aimed at ensuring RTÉ could invest available resources in innovation and digital services.

Further investment into the mast and transmitter, which is no longer fit for purpose and has a significant carbon emission footprint, would significantly impair RTÉ's ability to meet the emissions reductions target required to contribute to the National Climate Action Plan.

252 LW has been in use for many decades, including for a time, broadcasting Atlantic 252 from 1988 till 2002. It was then used for TeamTalk 252 which lasted just a few months. It has been broadcasting Radio 1 since 2004.

The closure of the frequency has been announced before, but was met with objections from listeners.

RTÉ says its decision to take the Long Wave service off air is based on three interrelated factors:

Like all businesses RTÉ is seeking to reduce its energy usage in response to the climate crisis, public expenditure efficiency, and to reduce the burden on the national grid – and LW consumes significant energy.

The required investment to maintain the mast is very significant and given the greatly reduced number of listeners and the inaccessibility of longwave radio on newer devices means that this is a cost which is unfortunately no longer sustainable.

The increased accessibility of RTÉ services and content internationally in a range of other formats, which are reaching a wide audience.

RTÉ Director General, Dee Forbes said: "While RTÉ has invested considerably in prolonging the life of the transmitter to broadcast RTÉ Radio 1 on Long Wave 252, we can no longer justify this investment. Not only is RTÉ Radio 1 widely available in the UK across television and online services, including apps and smart speakers, the energy costs involved along with the cost of replacing the transmitter mean that, in line with the recommendation of the Future of Media Commission Report, the time has come to bring the Long Wave service to a close.

"While this may be disappointing to some listeners, RTÉ must continue to invest in critical projects underpinning our production, distribution and business activities, as well as digital projects which are essential to ensure we continue to deliver value to our audiences."

RTÉ is supporting this announcement with an information campaign on RTÉ Radio 1 Longwave, through ads in relevant UK titles, via posters and flyers which will be distributed to a number of community organisations via the Irish Embassy in London and the Irish Consulates in Britain, and across RTÉ's social media channels. This list is published by Hartvig Media ApS at the beginning of each month – based on details supplied by some of the stations, stations websites, monitoring observations, HFCC registrations, and some presumptions. The list is not copyrighted and may be published everywhere. Subscription by e-mail is free; write to shn@wmr.dk.

ITALY ON MEDIUM WAVES

Welcome to this 4.2 edition of "List of private MW stations in Italy". Unlike other lists that you can find over the Internet, this publication only lists stations currently on the air, expected to start operation very soon or temporarily off-air. Also included is information on how to contact the stations (E-mail and Web sites), QSL policies and, when known, transmitter powers and future plans. I have compiled this list by assembling information received directly from the stations and my own research. I have done my best to keep mistakes to a minimum.

Almost all of Italian MW stations are licensed. Despite this, solid data on hours of transmission, programmes, frequencies, and contacts are difficult to obtain because station practices themselves change often. Another point to be mentioned is the fact that frequencies sometimes change, and new ones or old ones appear or reappear. Some stations, especially those unlicensed, are not on the air daily and/or the frequencies rarely tend to be used all the day.

Most stations operate from the North of Italy (especially from the regions of Lombardia, Veneto and Friuli Venezia Giulia), a few from the central part of the country (Toscana, Emilia Romagna, Umbria, Marche, Lazio and Abruzzo) and, after the disappearance a number of years ago of Gold 1593 located in Sicily, virtually none from the South.

The details below have been updated based on my own monitoring reports from my location in Leporano near Taranto (South of Italy) and via a websdr located near Malvaglia in Canton Ticino, Switzerland, as well as on logs from a number of DXers, Fabrizio Magrone, Roberto Pavanello and others, all of them (unlike to me) living in the North of Italy that appeared recently in various Facebook groups and/or online DX publications.

I am also aware about other stations which have planned to start as soon as possible broadcasts on medium wave but - for the time being - they have been omitted. This list will probably be regularly updated and more details will be added in future. If you have any corrections, additions, comments or suggestions please don't hesitate to write to: dx@dxfanzone.com – Last but not least: if you find any error (and you are invited to let me know) be advised that it was absolutely unintentional! Antonello Napolitano.

Licensed and unofficial independent broadcasting stations on mediumwave (*L* means Licensed)

Freq.	Station	Transmitter Location,	Region of Italy
01)	603 Nuova Radio AM**	L Spoltore, PE.	Abruzzo
